

Course Title:	Exhibit Design for zookeepers
Developed by:	Development for this course was done by the European Professional Zookeeper Qualification Framework team and led by Jurre Breeders, Dana Canari, and Jan Harteman
Aimed at:	Zookeepers and prospective keepers, anyone with an interest in the topic
Language taught in:	English
Estimated time to complete:	approximately 1-1.5 hours
Cost:	FREE
Delivery Method:	Self-paced online module

Course Description :

This module offers you an overview of different aspects of exhibit design. It contains three general topics: Stakeholders, Enclosure safety and Habitat design.

You can check your knowledge at the end of every chapter.

The module relates to topic 3.1 Enclosure Design of the European Professional Zookeeper Qualification Framework.

Course aims:

By the end of the course you will be able to:

- Identify and describe the key stakeholders in exhibit design
- Describe safety requirements to be considered in exhibit design
- List different types of barriers and describe their appropriate usage
- Describe necessary components required to design an appropriate exhibit for animals

Assessment:

There are no formal assessments, but the course does contain some quiz questions to check your knowledge.

You can access the module [here](#).

Additional information:

The course materials are currently available in English, if you would like to translate them into another language to increase accessibility then please contact laura.myers@eaza.net.

This module was created as part of the European Professional Zookeeper Qualification Framework project funded by the European Union's Erasmus+ programme.
